

Quantum Storytelling

David Boje and Grace Ann Rosile
Cabrini University Doctoral Seminar

Quantum Storytelling

Our human body not a ONE, it is a walking climate, a ***multiplicity*** of 37 trillion living cells, exchanging with biotic cells of the whole ecosystems we traverse

This is a ***Grounding*** in the primordial *living story relational ensemble of multispecies storytelling at the **Quantums Storytelling** existence*

**For this we need Terrestrial Ethics,
posthumanist instead of humancentric ethics**
